

Short Report Summary

Project Title: Calculator using HTML, CSS, and JavaScript

Objective:

To develop a basic calculator capable of performing arithmetic operations such as addition, subtraction, multiplication, division, and percentage calculations.

Technologies Used:

- HTML
- CSS
- JavaScript

Features:

- User-friendly interface
- Arithmetic operations (+, -, ×, ÷, %)
- Clear and Delete buttons
- Keyboard support
- Responsive design
- Error handling for invalid expressions

Outcome:

The calculator successfully performs mathematical calculations in real time and provides an interactive user experience through a responsive web interface.
